GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Irrigation.
Account.

READ—the following papers :—

From Lieutenant-Colonel O. V. BODDY, R.E., Superintending Engineer, VI Circle, to the Chief Engineer for Irrigation, dated Trichinopoly, 26th September 1898, No. 1308 M.D.

I have the honour to forward, for approval and sanction, an estimate, amounting to Rs. 1,750, for excavating distributary and field channels from Thodaneri tank.

The distributary with two field channels will irrigate about 50 acres of dry land in Thodaneri village and also bring a supply to the Vangulam and Arasangulam tanks which have hitherto been difficult to supply.

Another small field channel will irrigate some waste land near the left flank of the tank.

The probable revenue is Rs. 1,020, and the work may be classed as remunerative.

ENCLOSURE.

No. 87 S.E.

REPORT to accompany the Estimate for Distributaries from Thodaneri tank.

	RS.
Amount of Estimate	1,750

The estimate provides for a small distributary with two field channels irrigating some 50 acres of dry lands in Thodaneri village with distributaries to fill Vangulam and Arasangulam tanks Nos. 22 and 23 in the list which accompanied G.O., No. 710 I., 19th August 1896.

The Arasangulam tank has an ayacut of 97 acres and is to be maintained, and Vangulam which is to be abandoned has a waterspread of 27 acres.

There has been great difficulty in supplying these tanks as they depend upon the drainage from the fields under Thodaneri and Samayanallur Peria tank, the surplus channel from the latter being very small and used as an irrigation channel, while the surplus channel from Thodaneri runs into inam Kallikudi.

The estimate further provides for a new head to sluice and a field channel to irrigate some waste lands at the left of the tank.

Thodaneri tank has a direct source of supply by a natural drain into which a distributary from 15 mile 3 furlong tails.

12th August 1898.

(Signed) T. W. S. SMYTH,
Ex. Engr., Special Periyár Division.

Note by the Chief Engineer for Irrigation.

The Superintending Engineer, VI Circle, submits an estimate of Rs. 1,750 for excavating a distributary and field channels from Thodaneri tank, supplied by the 1st Branch channel, Periyár project. The distributary with its field channels will irrigate 50 acres of dry land, and some waste land near the left flank of the tank besides supplying the Vangulam and Arasangulam tanks. The expected increase of revenue is Rs. 1,020.

2. The work may be classed as "remunerative" and will probably be completed by the 31st March 1900.

3. The estimate may be sanctioned.

(Signed) W. HUGHES,
13th October 1898. Chief Engineer for Irrigation.

ORDER—No. 876 I., dated 10th November 1898.

The estimate, amounting to Rs. 1,750, or Rs. 2,160 including establishment and tools and plant charges, for excavating a distributary and field channels from Thodaneri tank, under the 1st Branch channel, Periyár project, is sanctioned.

2. This sanction is registered as No. 93 I. of 1898–99, and will expire on the 31st March 1900.

3. Ordered that a copy of these Proceedings be forwarded to the Government of India for information.
